Install the Wallet & Blockchain	2
Backup & Secure your wallet! IMPORTANT!	8
Create a new stealth address	11

Install the Wallet

1. Download the latest wallet Release from the link below.

<https://github.com/vergecurrency/VERGE/releases>

Latest release

4.0.1 fork for stealth

justinforvendetta released this 5 days ago · 17 commits to master since this release

Assets

Asset	Size
VERGE-QT-23-06-2018.dmg	26.6 MB
VERGE-windows.zip	19.2 MB

Source code (zip)

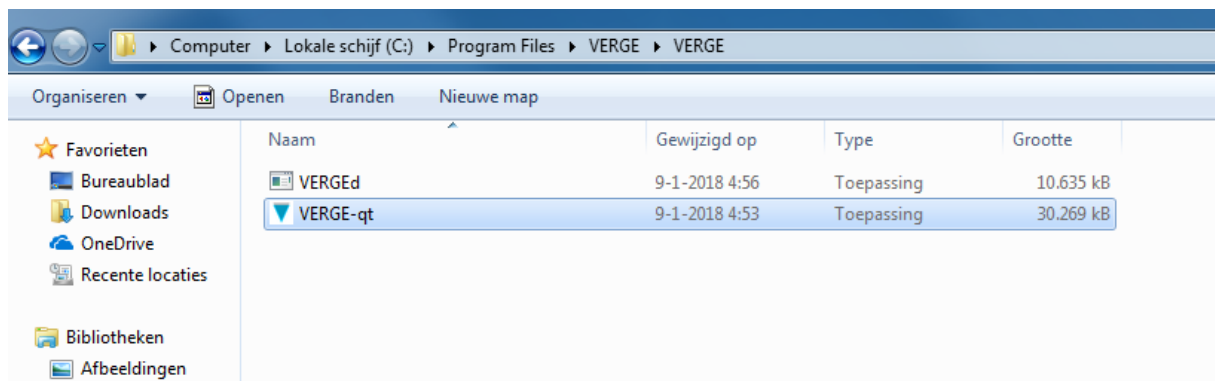

Source code (tar.gz)

Contains fork for stealth transactions at block 1,824,150, mandatory update.

VERGE-windows.zip - Windows GUI and daemon wallets. (updated 1/23/2018 at 4:24pm EST)

VERGE-QT-23-06-2018.dmg - Mac OSX wallet installer

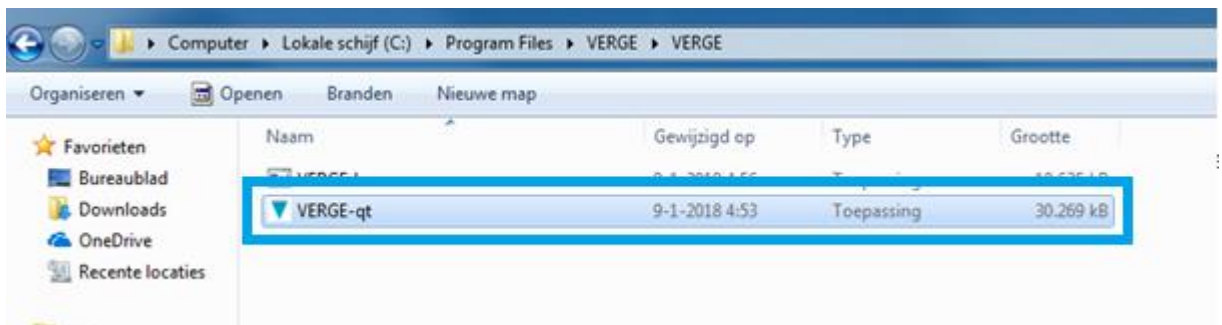

2. Now Create a Folder where you want to install the Verge-QT wallet. Open the ZIP and Drag both files from inside the ZIP there. Result should be as shown below.

6. After a few minutes the wallet will open itself.

7. Now Wait for the wallet to SYNQ.

8. You can speed up the SYNQ by installing the latest blockchain see my [INSTALL the Blockchain part](#)

If you are not getting active connections towards the Verge network Please check on your router/Modem if UPNP is enabled.

Install the Blockchain

1. Start by Downloading the Blockchain (choose one of the servers).

<https://verge-blockchain.com/download>

Download blockchain

Blockchain will be updated every night 00:00 o'clock GMT.

Blockchain download size = 1568.7 MB

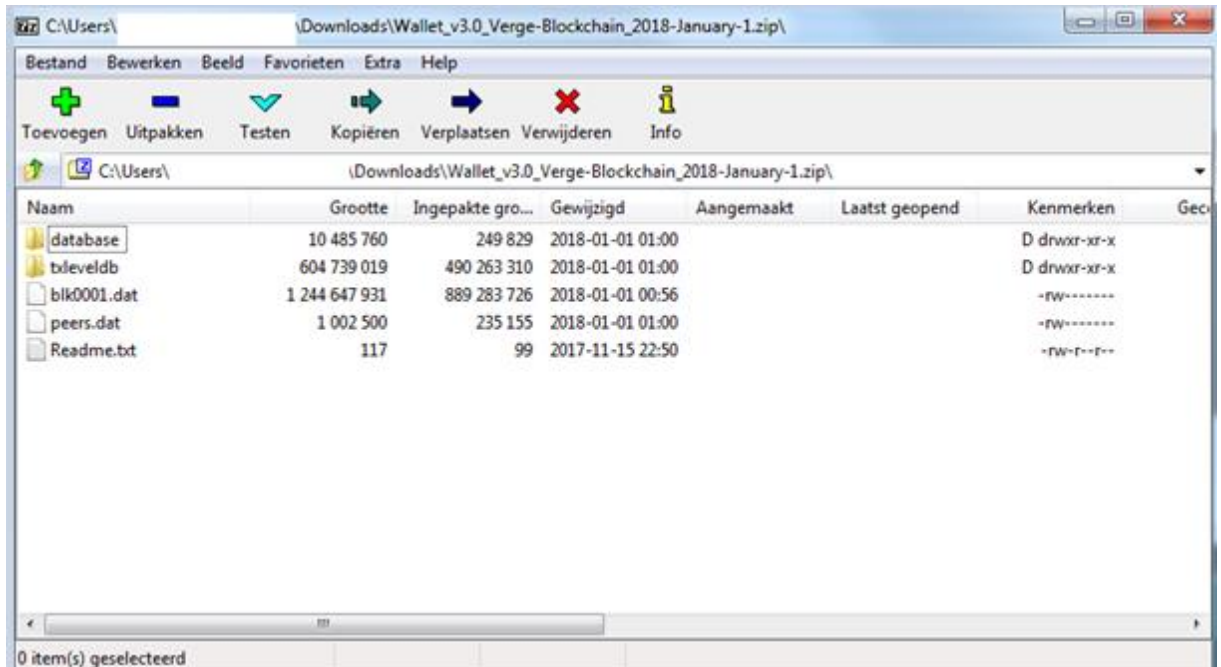

[server1_QT-Wallet_v3-v4.x_Verge-Blockchain_2018-January-23.zip.](#)

[server2_QT-Wallet_v3-v4.x_Verge-Blockchain_2018-January-23.zip.](#)

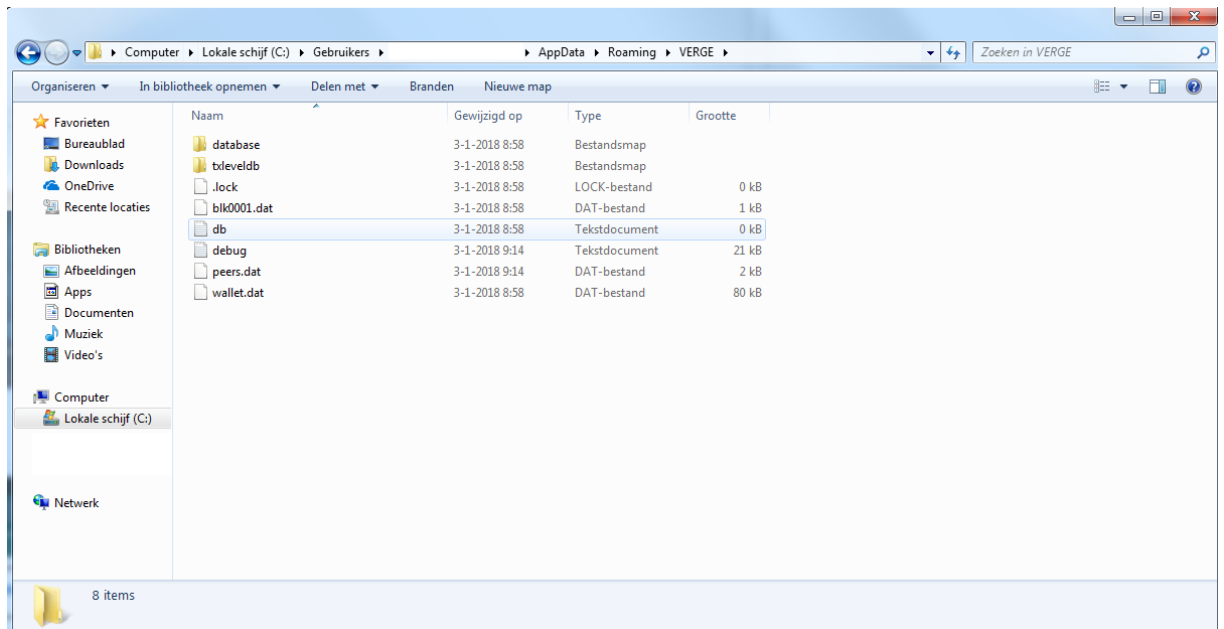

[server3_QT-Wallet_v3-v4.x_Verge-Blockchain_2018-January-23.zip.](#)

Download via Torrent Network

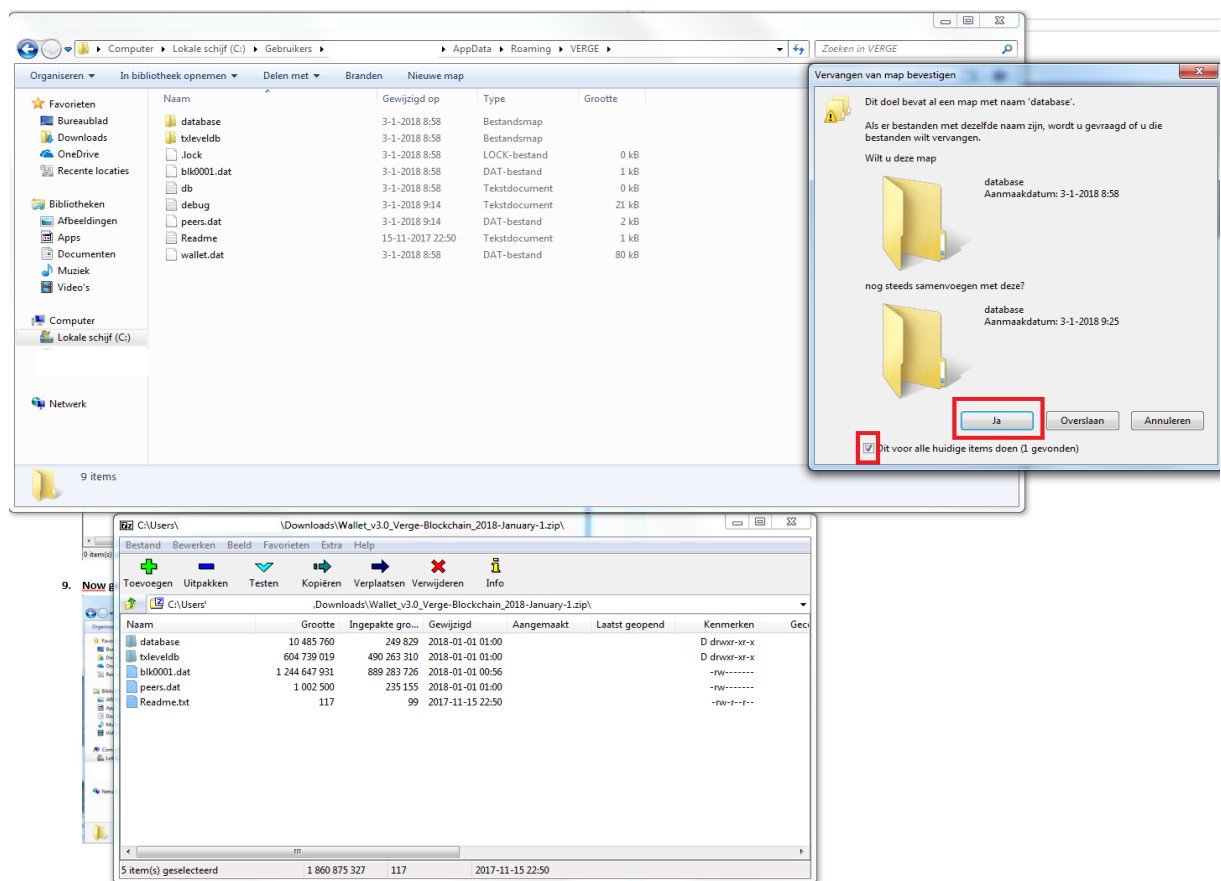

2. Now open the Verge blockchain ZIP file you have downloaded at step 1.

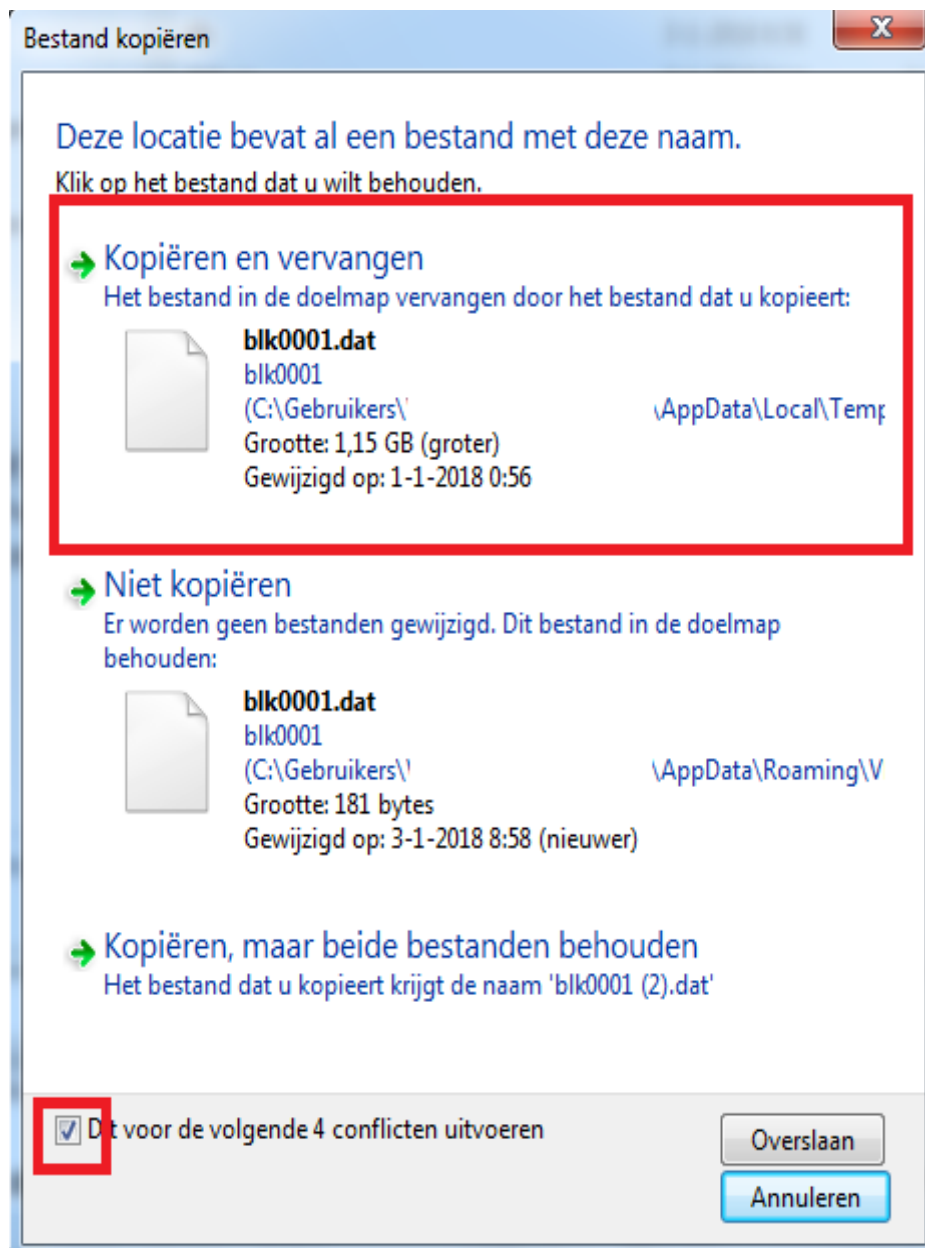

**3. Now go to the following location
(C:\Users\Yourusername\AppData\Roaming\VERGE)**

**4. Now Drag all Files from the Blockchain zip inside the following map.
(C:\Users\Yourusername\AppData\Roaming\VERGE)
And replace**

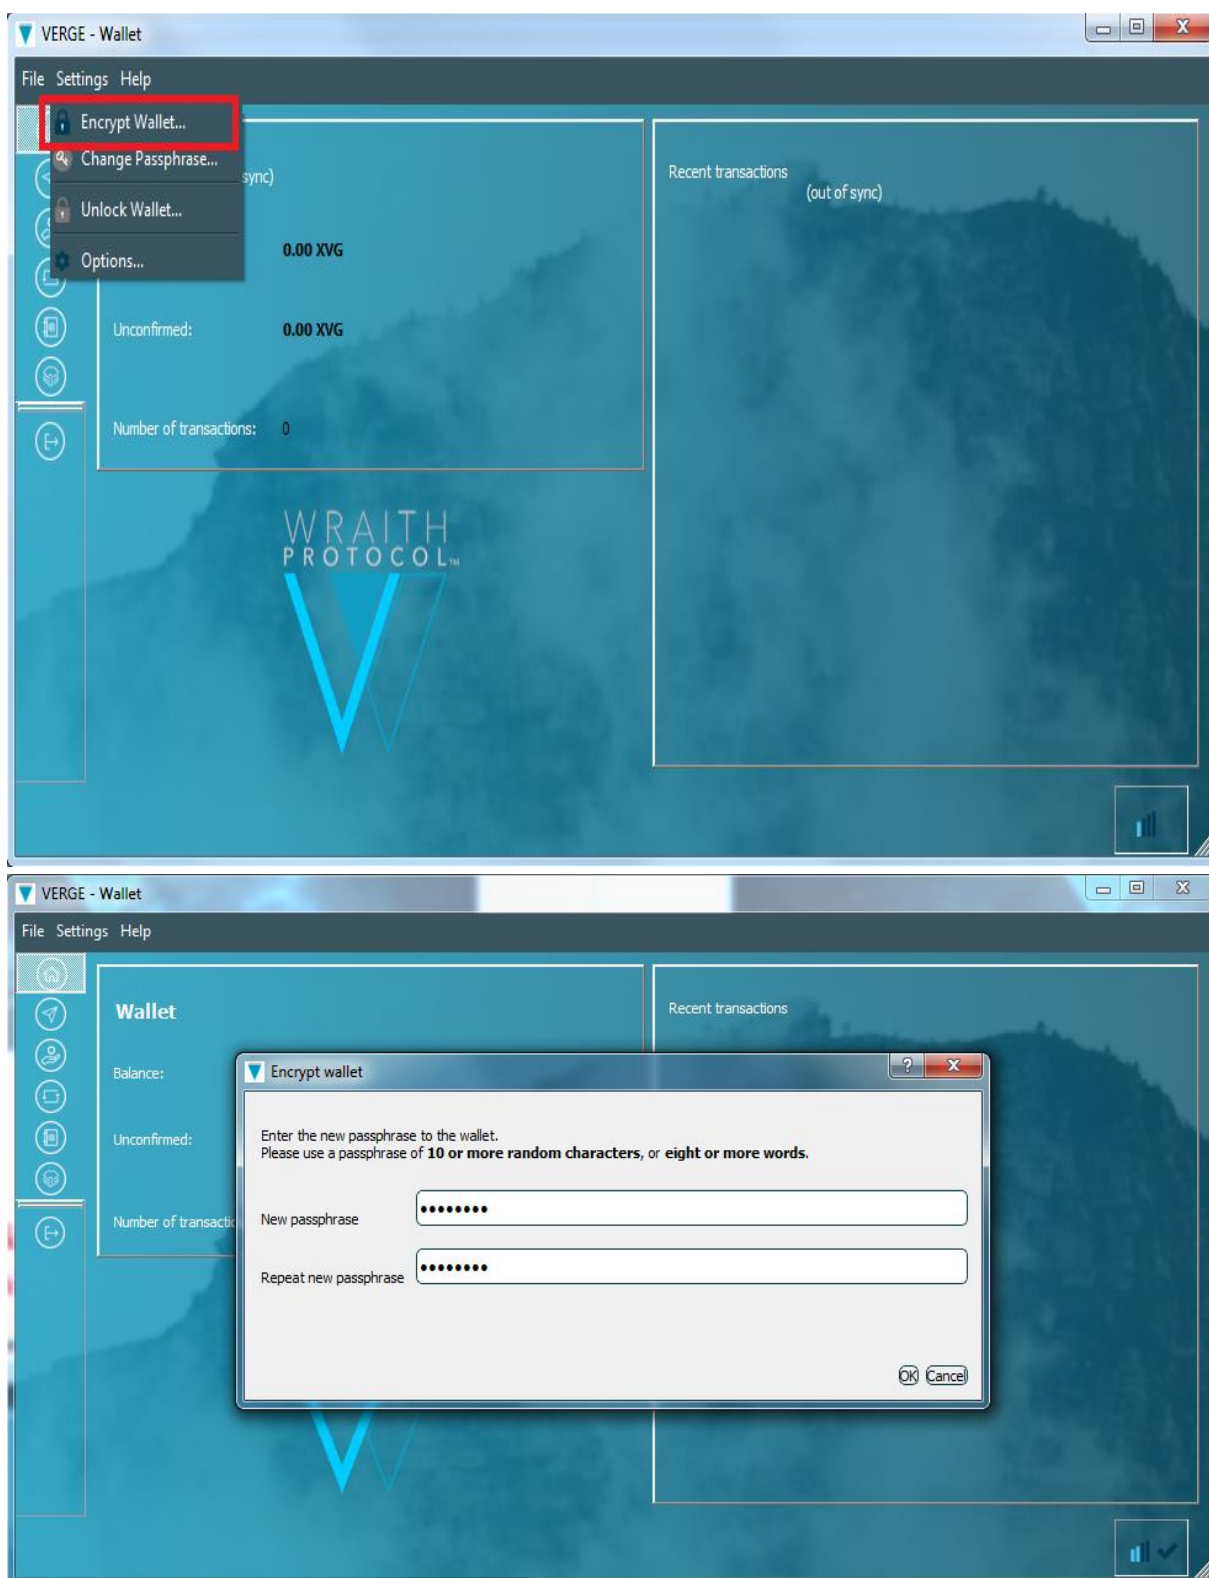

5. Now you'll get another popup. Check the box to do this for all files . Now Select Copy and Replace.

6. You now have preloaded the blockchain!

Backup & Secure your wallet! IMPORTANT!

1. Encrypt your wallet with a passphrase write it down DONT LOOSE IT!.

Donation Address: DSj95XMDWpuoMeJ31qpayiE6WGDPK33wXG

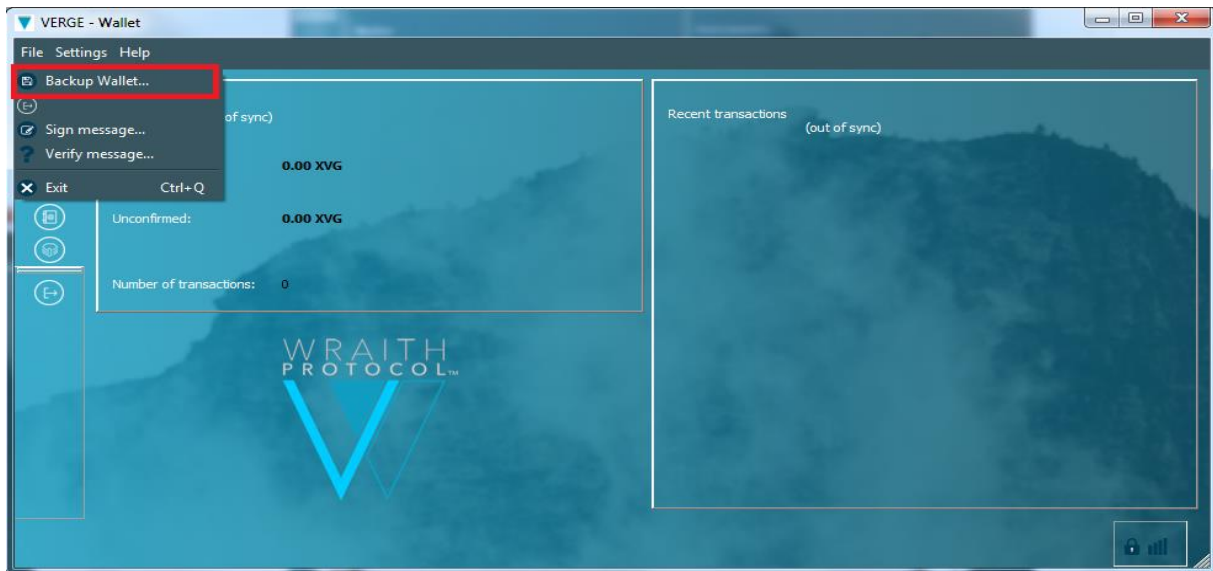

2. Click on OK and then YES (**NEVER LOSE YOUR PASSPHRASE**)!

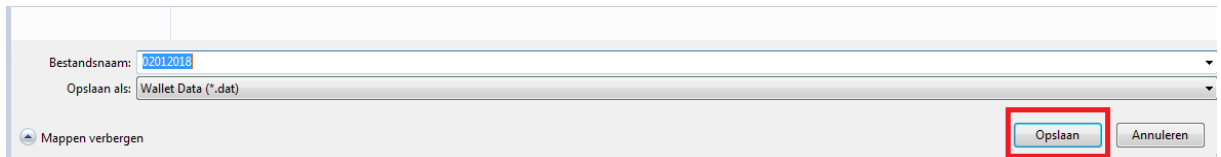

3. **Read the next Popup carefully!** And click OK. Your wallet will now restart.

4. Now startup you wallet again. We will now begin to backup your wallet. Click on backup wallet. (FILE>Backup WALLET)

5. Now Backup the file towards a USB drive. Just to be extra carefull Also do this also with a second USB drive.

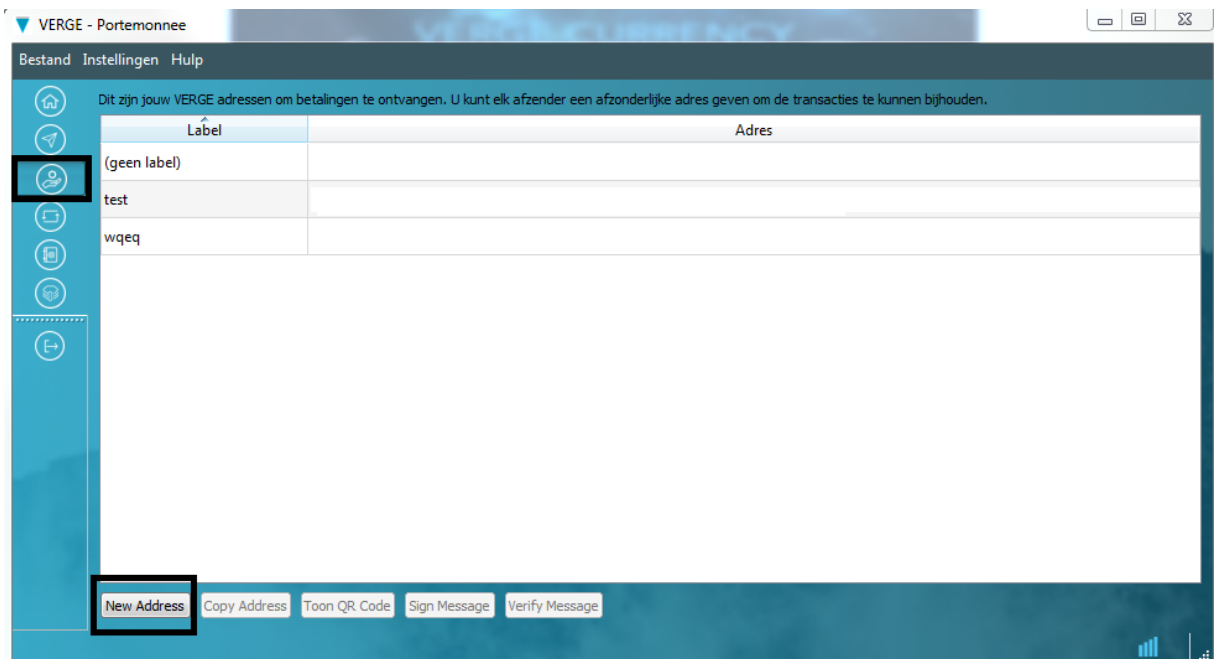

6. Store BOTH USB sticks and your passphrase on a safe place! You are now SETUP and SECURE!

Now if for some reason you PC drive crashes and you need to recover the wallet. Just copy the Backup from your USB drive Rename it wallet and put it in the following folder. (C:\Users\Yourusername\AppData\Roaming\VERGE) This will replace the OLD wallet.dat file. You have now restored your lost wallet!

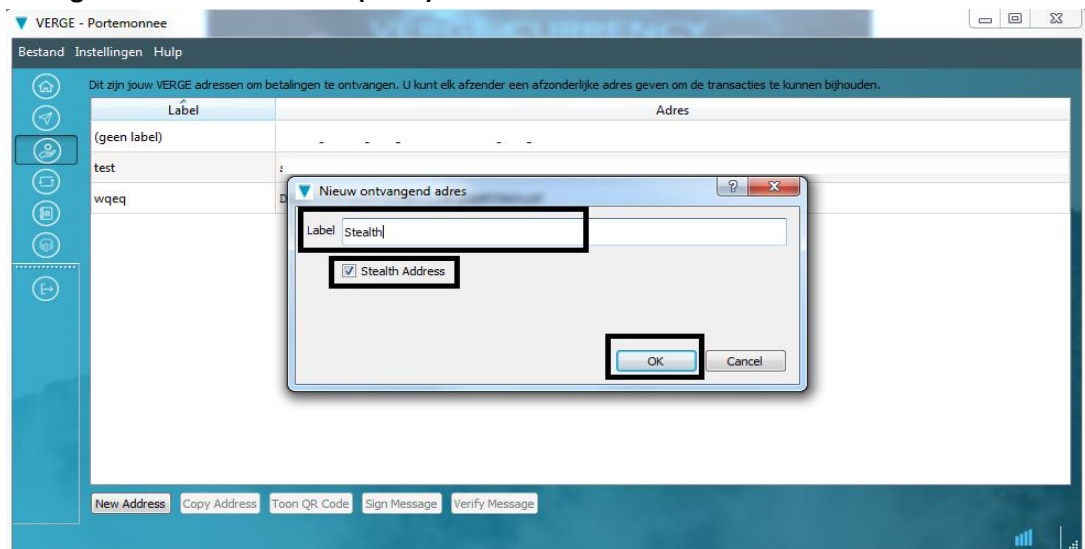

wallet.dat	3-1-2018 11:57	DAT-bestand	64 kB
------------	----------------	-------------	-------

Create a new stealth address

1. Go to your address tab and click New Address.

2. Now give the wallet a Name (label) check the Stealth Address box. Then Click OK.

3. Congrats you now have a stealth address enjoy your privacy!.

I hope this guide has been of help to you. If by any chance you still need some sort of support feel free to contact me at the Verge telegram group @Akashiro. Enjoy your working wraith wallet and STEALTH!!
