VERGE

Stealth Transactions

This guide will show you how to make
your own stealth transactions.

This guide is created by Akashiro_NL

HOW TO DO STEALTH TRANSACTIONS

**Author: Akashiro_NL**

Always backup your wallet.dat after you created a new address or received / sent Verge

Create a new stealth address

- Go to your address tab and click new Address.

- Now give the wallet a Name (label) check the stealth Address box.then click OK

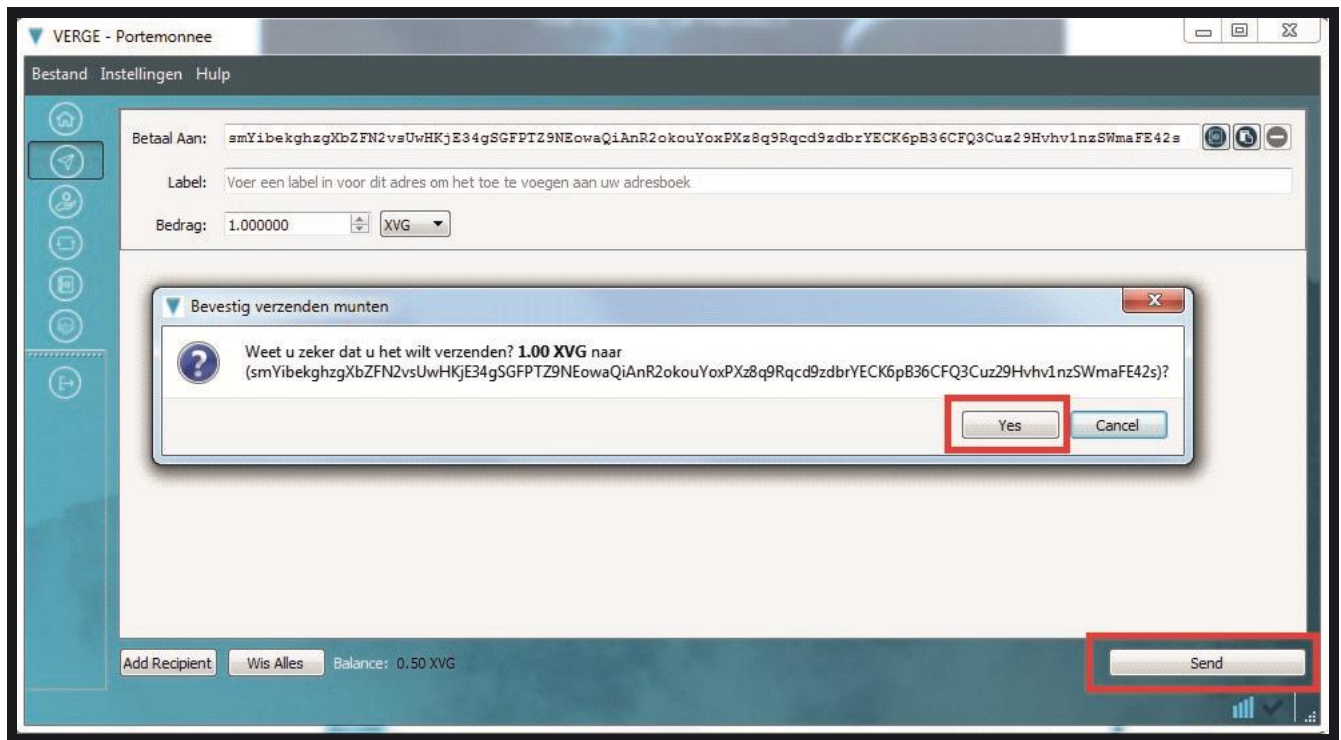

- You now have your own Stealth Address

How to do a stealth transaction
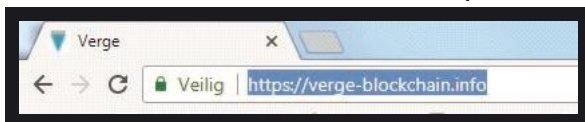

- Go to your send transactions tab.

- Now Enter a Stealth address outside of your wallet. You can use my stealthaddress if you want to test. In real life situation you ask for the recievers stealth address. Or give your own (STealth at the FLIP of a switch).

- Stealth Address:
smYibekghzgXbZFN2vsUwHKjE34gSGFPTZ9NEowaQiAnR2okouYoxPXz8q
9Rqcd9zdbrYECK6pB36CFQ3Cuz29Hvhv1nzSWmaFE42s
- Now click on the SEND button.

- You just did a stealth transaction.

Lets check the stealth transaction

- Go to the XVG blockchain explorer at www.verge-blockchain.info

- Now first lets try and lookup your stealth address. Copy your stealthaddress in the explorer and press SEARCH. You won't find your wallet address

- Now get the transaction ID of your transfer by rightclicking the transaction. Then select Show transaction details. And copy the transaction ID

- Now put this transaction ID inside the blockchain explorer.

- Looking at the image Above i can only see the 1 XVG transfer. Still mymain stealth address balance doesnt show up! Only thing i can see here is the ammount send. Neither of the senders or recievers address is showing up. This shows me the tech is working like intended!
